Abstract (en)
[origin: DE10129640C1] Mechanical watch has a wind up mechanism with a wind up lever that connects to the core (5) of the barrel spring (4) via an axle at one of its ends, while its other end connects to a wind-up ring. The mechanism also has upper and lower ratchet elements. The two ratchets have ratchet links via which they connect to upper and lower ratchet wheels. An adjustment lever connects to an adjustment wheel.
