Abstract (en)

[origin: EP1271448A1] The method involves detecting specific data re the surroundings, movement and/or location of the vehicle during its operation and recording it in a memory (M,SM) for later processing as required. At least part of the specific journey log data is transmitted and/or received via a radio interface (V1;V2;VB) of a radio-assisted memory device (MS1-MS3) in the vehicle. AN Independent claim is also included for the following: a journey log and a communications system for recording journey log data for a vehicle.
