Abstract (en)

[origin: DE10129176C1] The multi-pole switch has switch contacts (6) positioned in a row across the collector rail system within a housing (1,2), a fuse (21) associated with each switch contact, all switch contacts operated by a common slider (5) and a pivoted operating lever (8). A cover (11) is hinged to the housing for covering the fuses and has a stop (38) acting as a counter-bearing for the operating lever in the closed position.
