Abstract (en)

[origin: EP1272002A2] The hearing aid has a housing shaped to fit behind the ear, containing a microphone (1) with a microphone housing (2) provided on opposite sides with sound entry openings (3A,4A) at the ends of sound entry connections (3,4) coupled to sound entry openings on the opposite sides of the hearing aid housing. The microphone sound entry openings lie proximal and distal to the head of the hearing aid user when the hearing aid is fitted behind the ear.
