Abstract (en)
[origin: WO0174583A1] A molded finished part includes a finish insert (172) with a finish disposed upon a front insert side and a body portion of the molded part. The insert (172) has a substantially rigid yet resilient layer of moldable material. The layer has opposing front and back insert sides. The part body portion has a body surface that corresponds to the back insert side. The body portion is also formed of moldable material. Further, the body surface and the back insert side are melded together in a substantially indistinguishable interface.
