Abstract (en)

[origin: WO0172525A1] The invention relates to a printed data carrier comprising a printed surface and at least one partial printed surfaced enclosed thereby on all sides. The surface and partial surface are printed using photogravure and are visually contrasting on account of the differing thicknesses of the colour coating applied thereto. The invention also relates to a method for the production of said data carrier, the printing plate used therefor and a method for the production thereof.
