Abstract (en)
[origin: WO0179644A1] The invention concerns an insulating glazing comprising at least two glass sheets (10, 11) separated by a gas gap (12), an interlayer (2) for spacing apart the two glass sheets and having an inner surface (20) opposite the gas gap and an opposite outer surface (21), and sealing means (3) with respect to the inside of the glazing. The invention is characterised in that the interlayer (2) is in the form of a substantially flat extruded section with encloses the periphery of the glazing by being pressed by its inner surface (20) against the edges (10a, 11) of the glass sheets, and maintained fixed by securing means (4).
