Abstract (en)
[origin: WO0174120A1] The invention concerns a disposable small-size light-emitting device (1) comprising a light source (3); an integrated electronic control module (4), and a power source (5), said electronic control module including means (6) for reducing power consumption of said electronic module and or of said light-emitting elements, when stored and not in use, and optionally means (7) reducing their inertia on being switched on, and means (8) for switching on/off said light sources. The invention is adaptable and capable of being integrated in all types of disposable light-emitting articles, for fun or not such as for instance glasses, lighters, decorative objects.
