Abstract (en)

A biodegradable covering paper for lavatory pan has a roundish laminar body (10) obtained from a sheet of biodegradable material and comprises a central opening (4) in such a way that, when the covering paper is applied to adhere to the inner walls of a lavatory pan, the central opening (4) of the covering paper is positioned in correspondence with the discharge conduct of the lavatory pan where the pan narrows and the level of water begins. The covering paper is designed to be removed into the sewer with the corporal wastes when a flushing system is operated. <IMAGE>
