Abstract (en)  
[origin: EP1273749A2] The underneath and top edges of the slide elements (2) move along a slide plane. Roller bodies (5) attached to the underneath edge at least fit into a bottom profiled section (6). The top edge of the slide element has no roller bodies and has at least one fixed side guide, preferably flexible guide rails especially brush-strips. the underneath edge of the slide element has at least one barb (14) gripping over at least one attachment (12) to the runner rail (11-13) for the roller body.
