Abstract (en)
[origin: EP1273755A2] A stretcher frame containing netting or mesh fabric has holder-angle-pieces (19) gripping behind the window or door frame and positioned on opposite facing frame-sections (1). Preferably the holder-angle-pieces incorporated in the upper side of the stretcher frame are each held on a slide-carriage (7) guided along the vertical stretcher frame section. The slide-carriage has a side pressure-piece (8) supported on the stretcher frame. The pressure piece is contained in the second of a double chambered section forming the frame section.
