Abstract (en)

[origin: EP1273792A2] The injector body (13) has two fuel passages (30,31) at an angle to one another to supply a central chamber (5) enclosing a control chamber (3) from a high pressure connection (7). A further passage (32) supplies fuel via a fuel duct (9) to the injector nozzle. The diameters of the first two fuel passages are many times smaller than that of the central chamber.
