Abstract (en)

A polymer compound (I) with a nonlinear current-voltage response comprises a polymer matrix and an embedded filler having a nonlinear current-voltage response. The filler comprises at least two filler components with differing nonlinear current-voltage responses. An Independent claim is included for a process for the production of the polymer compound (I) by mixing a polymer and filler components in a mix ratio to produce a polymer compound (I) with the desired nonlinear current-voltage response.

Abstract (de)

Das Polymercompound enthält eine Polymermatrix und einen in die Matrix eingebetteten Füllstoff. Der Füllstoff umfasst zwei Füllstoffkomponenten mit voneinander abweichenden nichtlinearen Strom-Spannungs-Kennlinien. Durch Auswahl geeignet bemessener Mengen dieser Füllstoffkomponenten kann so ein Polymercompound mit einer vorbestimmten, von diesen beiden Kennlinien abweichenden nichtlinearen Strom-Spannungs-Kennlinie gebildet werden. <IMAGE>
