Abstract (en)
[origin: DE10017457A1] The invention relates to a receptacle for grinder tools, especially for a hand-held right angle grinder (10). The inventive receptacle comprises a carrier device (12, 14, 16, 182, 184, 300) by means of which an application tool (18, 32, 186, 188) can be connected to a primary shaft (54) in an active manner. According to the invention, the application tool (18, 32, 186, 188) can be connected to the carrier device (14, 16, 182, 184) in an active manner by means of at least one locking element (24, 26, 190, 192, 194, 196, 198, 200, 302) which can be moved against a spring force and is locked in an operating position of the application tool (18, 32, 186, 188) and thus fixes the application tool (18, 32, 186, 188) in a positive fit.
