Abstract (en)

[origin: WO0178953A2] The invention relates to a device for the transverse cutting of a web, whereby the cutting blades can be optionally withdrawn to allow, for example, a spoil-generating web to be diverted from a folding apparatus without problems.

[origin: WO0178953A2] The invention relates to a device for the transverse cutting of a web (26), whereby the cutting blades (3) can be optionally withdrawn to allow, for example, a spoil-generating web (26) to be diverted from a folding apparatus (1) without problems.
