Abstract (en)  
[origin: US6647923B2] The invention relates to an animal waste collection device. The device claimed for the invention comprises a casing provided with side collection bag removal openings, at least one movable equipped side door or wall, at least one access opening which is made in such removable side door or wall or any other surface which is not a lower surface and which permits introduction of used individual collection bags into the interior of such casing. The interior of the casing holds a moving carriage which may be pulled toward the exterior by sliding motion and which carries a gathering bag for individual collection bags.
