Abstract (en)

[origin: EP1275520A2] Printing blanket manufacturing device has an application layer located directly on a base, polymer applicator (26) for applying polymer on application layer to form a flexible sleeve (18), and print layer applicator (50) for applying print layer (12) on the sleeve. At least one of application layer and polymer layer forms an innermost layer of the sleeve. <??>Independent claims are included for the following: <??>(1) formation of tubular printing blanket (10); and <??>(2) offset printing blanket which has a flexible and collapsible inner sleeve which is the innermost layer of the blanket, and print layer disposed on the sleeve.
