Abstract (en)

[origin: EP1275791A2] Arrangement for laying roofing tiles, ridge tiles, or other roof covering parts (1) on roof battens in which the under side of the roof covering part facing the batten has a recess interacting with a spring clip (3) fixed to the batten is new. The recess is a groove which protrudes from the under side of the roof covering part. The spring clip has a bar (4) protruding in the direction of the recess and has a blocking piece (5) at one end. Preferred Features: The groove-like recess is formed in a material layer of the roof covering part.
