Abstract (en)  
[origin: EP1275906A2] Device comprises a connecting element (1) having a heating body bearing element for attaching to a heating body (2) and an object bearing element for attaching to a fixed object. The heating body bearing element is a fixing element used to fix the connecting element in the region of a free edge (3a) of the heating body so that it does not move. Preferred Features: The object bearing element is a plate (5) placed around the fixed object.
