Abstract (en)
[origin: WO0178509A2] The invention relates to a novel method for producing wax premixes containing agrochemical active substances by mixing finely divided mixtures from at least one solid, agrochemical active substance and at least one vegetable or mineral oil with a finely divided wax in a mixer that is provided with a sharp-edged mixing device. The mixtures are mixed at high mixing speed and the temperature in the mixer is below the melting temperature of the wax used. Optionally, further additives are added to the product thus obtained.
