Abstract (en)

[origin: WO02068239A1] The invention relates to a drinks holder (10), for fitting in the dashboard of a motor vehicle. The drinks holder (10) comprises a drawer-like extension (14) with a guided movement, comprising adjustable openings (32) for the positioning of drinks containers such as, for example, drink cans, beakers or cups. According to the invention, a pivot piece (22) which can pivot downwards is provided on the rear side of the extension (14), which on retraction of the extension (14) swings down into a housing (12) such that a length of the extension (14) in the direction of travel is shortened. The invention permits a compact housing (12) for the drinks holder (10) which can be shorter than the diameter of the positioning opening (32) in the direction of travel.
