Abstract (en)

[origin: WO0183289A1] The invention concerns a motor boat with planing hull, whereof the bottom is W-shaped in cross-section and comprises a longitudinal central tunnel with an upturned V-shape, formed by two median surfaces (12, 14) of the bottom and extending substantially over the entire length of the hull, the base (24) of said tunnel being at waterline level (26).
