Abstract (en)
[origin: WO0179077A1] The invention relates to a container bag for liquid cosmetic products, comprising at least one elastic membrane wall (2, 3) which surrounds the container area (13), a ring frame (6) which surrounds the membrane wall and a ring-shaped protective shell (17) which fixes the ring frame and which provides a peripheral ring channel (21) surrounding at least the edge areas (9, 11) of the membrane walls so as to protect them. The protective shell is made up of an upper and a lower shell element (4, 5) and the ring frame (6) is fixed in the area of the dividing surfaces of the two shell elements (4, 5). The aim of the invention is to produce a more stable container bag of this type. To this end, the profile of the ring frame (6) has at least one raised part and/or lowered part, the dividing surfaces of the shell elements having a counter-profile corresponding to this and the shell elements and the ring frame engaging with each other with the profile or counter-profile, with a form fit.
