Abstract (en)

[origin: WO0181008A2] This invention provides a vehicle masking material and method of use. The masking material in one embodiment includes a dextrin and a thickener and/or a co-film former, a plasticizer, and water. The masking material may additionally include a surfactant. The masking material is applied to a surface which is to be protected from paint overspray or other coating processes, allowed to dry, and the surface is coated (<i>e.g.</i> with paint). After drying of the paint, or other coating , the masking material is removed by water washing.
