Abstract (en)

[origin: WO0180140A2] A method is provided for affording technical services in a contract manufacturing framework. First, a database including a plurality of service provider data structures is provided, wherein each service provider data structure includes a description of a particular service provider. Then, the database is queried using request data from a user. A particular service provider data structure is then identified based on the request data, wherein the particular service provider data structure includes information concerning process design services. Finally, the user is sent information concerning process design services utilizing the identified service provider data structure.
