Abstract (en)
[origin: WO0184676A2] An electrical connector (8) comprises at least four long conductive elements (16, 18, 20, 22) which each extend between a first contact (30) at one end and a second contact (28) at the other end. Sections (44) of the conductive elements have recessed parts (42) in order to increase the distance between adjacent pairs (20, 16; 18, 22) of the conductive elements at points next to the second contacts (28).
