Abstract (en)
[origin: EP1277498A1] Gas under pressure passes through an inlet (14), through the stub into the bottle (1). A long pipe (11) on the stub, reaches down below the surface (17) of the fluid in the bottle. The fluid flows up through drillings in the handle (4), and its release is controlled by a valve (13), connected to a trigger (7). There is a guard bar (8) in front of the trigger.
