Abstract (en)  
[origin: US2002195027A1] A pallet (2) has a substantially planar deck (6), a supporting structure (10) that supports the deck (6) above the ground, and a plurality of retractable locating means (20). Each locating means (20) is adjustable between a first position in which the locating means extends above the deck (6) to engage and limit movement of articles placed on that surface, and a second position in which the locating means is located at or below the deck (6), such that the surface is substantially unobstructed.
