Abstract (en)
[origin: EP1253299A2] The casing (10) has a sump (26) fixed at least indirectly to a main sector. The casing has at least one functional frame (16, 18), which is fixed at least indirectly to the main sector (12). The functional frames have at least one holding sector which projects into the sump cavity, and to which at least one functional element (40, 46) of the machine is fixed.
