Abstract (en)

[origin: EP1277927A1] The locating device includes a first support body (16) connected by bolts to the first component (14), a second support body (22) fixed to the second component (12), and an elastomer membrane (20) flexibly connecting the two support bodies to each other. The second support body can be fixed at a spacing from the first one by more bolts (32).
