Abstract (en)

[origin: EP1278220A2] The present invention relates to switch or volume control assemblies, in particular to switch or volume control assemblies to be mounted in e.g. hearing aids, said assembly comprising a movable member, such as a wheel-like member positioned between at least two detachable parts defining the exterior of a housing, the movable member having a part extending out of the housing, the movable member engaging a contact member so as to move the contact member with the movable member. <IMAGE>
