Abstract (en)
[origin: WO0182728A1] The invention relates to a glove that allows for increased tactility and that has no seams in the zone of the finger tips. The palm of the inventive glove is especially produced from soft (glove) leather which is preferably hyrophobed and oleophobed. The exterior or the back of the glove is produced from a breathable and skin-friendly material that is longitudinally elastic and that can be hydrophobed and oleophobed.
