Abstract (en)
[origin: WO0183051A1] A device for playing the game of curling comprises a body portion (10) having mounted therein so as to protrude from its underside three ball bearing units each having a ball (12b, 13b, 14b) protruding from the underside of the body portion (10). The balls serve to reduce friction when the device moves along the ground during the course of a game. The device may further include a handle (20).
