Abstract (en)
[origin: WO0177434A2] Aqueous dispersions (W) which comprise the following components: (A) at least one condensation product of at least one C12-24-fatty acid or at least one low-molecular-weight alkyl ester thereof with 2-[(beta -hydroxyethyl)-amino]-ethylamine, (B) at least one (C12-24-fatty acid)-[gamma -(N,N-dimethylamino)-propyl]amide, and (C) at least one low-molecular-weight carboxylic acid, and optionally (D) at least one oligoethylene glycol, liquid at ambient temperature, and/or (E) at least one formulation additive, and are substantially free from dispersion-modifying other additives (Z), in particular concentrated dispersions (W'), are eminently suitable as softener compositions for the non-permanent, softening finishing of dyed and/or optically brightened textile piece goods in rope form or tubular form by exhaust methods from aqueous liquors in jet dyeing machines.
