Abstract (en)

[origin: WO0179747A1] The invention concerns a gas bottle in particular for medical use, comprising a generally cylindrical bottle body (1) comprising members (3) regulating gas output and optionally a protective covering (2) arranged around the members (3) regulating gas output. The invention is characterised in that the bottle body (1) is at least partly covered with at least a first protective casing (11), and the members (3) and/or the protective covering (2) are at least partly covered with at least a second protective casing (21). The invention also concerns a protective packaging for a gas bottle formed with a first protective casing (11) portion and a second protective casing (21) portion mutually integral and/or formed in a single piece, the first casing portion (11) comprising a disc-shaped base (12) to protect the base of the gas bottle.
