Abstract (en)

[origin: WO0177859A2] The invention relates to a method according to which a portal site (10) for a user is automatically generated on a terminal (12). A request profile (16) of the respective user, terminal-specific parameters (18) and services which are available for the terminal (12) are detected. The selected services are subsequently allocated. In another embodiment, a portal site is automatically generated.
