Abstract (en)

[origin: WO0184856A1] The invention relates to a switching centre (1) for connecting telephone objects (2a ... 2n) to a telephone network, comprising a control device (3) wherein operational functions can be administered by authorized operators by inputting commands via a terminal (6), and verification means (4) for checking access authorization enabling certain operators to administer within a group (5). The invention also relates to a method for administering operational functions in the switching centre.
