Abstract (en)
[origin: EP1279419A1] The alpine ski (1) has a raised section (5) to carry the bindings formed by a thickening in the ski structure. The ski has an insert (12) over a section of the ski length. The insert is positioned between the upper face (6) of the raised section and the edges (9). The exterior surface of the insert is flush with the side faces of the ski. Claims include a method of making the ski
