Abstract (en)

[origin: EP1279420A1] The method of making a snow ski (1) involves using a mould with additional inserts (43) positioned in the mould prior to use. The inserts are placed between the mould sections at the level of each side face of the ski. At least part of each insert is eliminated after moulding to form a groove (12) along each side edge of the ski. Claims include a ski made by the method
