Abstract (en)

[origin: EP1279596A1] A machine with a dome (10) for packaging products in centre-folded heat-shrinking film (11) comprises a body (12), upon which a mobile dome (13) is applied, where said dome (13) defines a heat-shrinking chamber (14) equipped with at least one heat source (15) and at least one fan (16) for circulating air. A sealing frame (17) and a transportation and support surface (20) are moreover foreseen. According to the invention, said transportation surface (20) is of the high-friction type, such as to drag the product (21) until it is yanked free from said heat-shrinking film (11) held under sealing rods (18) of said frame (17). <IMAGE>
