Abstract (en)
[origin: EP1279611A2] The pallet load-carrying surface has a length of at least four times its width, and continuous longitudinal bars (2) connected by crossbars (3). Vertical posts (4) are fastened to the outward facing side (21) of each long bar. Several pallets can be stacked inside each other in longitudinal direction, offset by the width of post, and also on top of each other. The lower faces of the long bars form support faces (22) for the pallet. The long bars have lower apertures, and rectangular tubes (5) are pref. welded into the apertures. The pallet also a telescopic extension unit on one narrow side.
