Abstract (en)

[origin: EP1279634A2] The side edge position control device positions the side edge on a resting table against front marks in accordance with the front edge of the measuring device. The measuring device can be displaced by a setting device transversely to the sheet feed device (4) transporting the sheets (2) against the front marks. It is connected to a path measuring device (10), the readings of which are passed to a calculator.
