Abstract (en)
[origin: EP1279771A2] The construction consists of concrete elements (1), each with a fence element (2), and connected along their end faces (1.1) by interlocking hook-shaped connection links (3). Located above each connection link is a holder pocket (4), open at the top, for a fence post (5). Each post has a similar hook-shaped connection link (6) directed towards the fence post of the neighboring concrete element. The pocket is formed by a mainly C-shaped metal profile set into the concrete and provided with anchoring reinforcement (8). Each fence element is of round steel bars welded or screwed to the post.
