Abstract (en)

[origin: EP1279787A1] The device has a lock mechanism with a force engagement element in the form of a preferably cylindrical lock nut (8) rotatable about an axis, a measurement system for detecting the lock nut position with at least one fixed sensor (12) and at least one measurement element (13) coupled to the lock nut. The measurement element is at least partly annular and at least partly encloses the lock nut in the assembled state.
