Abstract (en)

Frame for outside use comprising at least a wing (1) and a carrying frame (8), both of wood, which are inside and/or outside provided with a covering profile (2,10) still of wood which is secured in an easily removable manner by pivotable locking members (3) which are screwed to the surfaces to be covered of the window frame and the carrying frame and able to be inserted in suitable shaped grooves (4) formed in said covering profiles (2,10). All frame components are finished products ready to be assembled with the interposition of thermal and acoustic insulation gaskets (7,13); wing, carrying frame and inside coverings are formed by uprights and cross beams coupled to one another. Such characteristics ensure the fast assembling of said coverings that can be easily replaced, if necessary, with other coverings with the same or different shapes and colours.
