Abstract (en)
Software driver installation is automated. An automated installation object (14) is run on a system (10). The automated installation object (14) determines which peripheral devices (11,13) are attached to the system (10). The automated installation object (14) determines for which peripheral devices (11,13) found attached to the system (10) the automated installation object (14) is able to perform automated installation. For each of these peripheral devices the automated installation object (14) determines a network location (16,18) that contains a driver installation program for the peripheral device (11,13). The automated installation object (14) downloads the driver installation program from the network location (16,18). The automated installation object (14) runs the driver installation program on the system (10) to install a device driver for the peripheral device (11,13).
