Abstract (en)

[origin: EP1280178A1] The circuit breaker has a container (12) with a socket (14), a cover (16) and with a front opening (46). A fixing mechanism (30a,30b) connects the socket and cover. The circuit breaker is internally held. The fixing mechanism has an elasticated hook with its central part extending from the front to the rear wall and having a front foot section pulled down onto the rear wall assuring cover socket gripping.
