Abstract (en)

[origin: EP1280389A1] The system has at least one x-ray source with a control grid, at least one x-ray image converter and an x-ray generator for supplying the source and with a high voltage generator, an arrangement for switching the high voltage on and off and a grid control circuit for blocking the control grid and the current through the source during an image converter transport time interval and then allowing the current through the source. <??>AN Independent claim is also included for the following: an x-ray generator.
