Abstract (en)

[origin: WO0182731A2] Cement-lasted footwear having an upper (19), which is constructed with an outer material (21) and with a waterproof functional layer (23) arranged on the inner side of the outer material (21) and has a lasting allowance (27) on the sole side, and a sole construction which has an outsole (49) and an insole (11) with an insole underside (13) and an insole center, wherein two lasting-cement zones adjacent to one another in the direction of the center of the insole are provided, of which a first is formed with a reactive hot-melt adhesive (15) which brings about waterproofness when in the reacted state, and the second is formed with a quick-bonding fastening adhesive (35), and at least the first adhesive zone is formed by a zone which is closed in the direction of the periphery of the insole and seals at least a part of the width of the lasting allowance (27).
