Abstract (en)
[origin: WO0181278A1] A process for the production of gasoline stocks wherein lower molecular weight olefins (line 102) are first oligomerized and the oligomers (line 105) hydrogenated is disclosed. In the first instance the oligomerization is carried out in a single pass fixed bed boiling point reactor (10). The oligomers (line 105) are then hydrogenated in a distillation column reactor (20).
